

**FL-USA 500 Pro-Video Series Description**

**The FL-USA 500 Pro-Video Series** provides high quality, Sony DSP based, Color surveillance video.

Featuring high quality Sony Color CCD/DSP daylight and infra-red NTSC cameras.

A great addition for today's security conscious business manager. Infra-red (IR) models are fully weather-proof and suitable for indoor or outdoor use when properly installed. Low light .1 LUX Color 1/3" CCDs provide the very best in image quality and sensitivity. IR Models have fixed lens selections for long range (16mm #534) or close up (3.6mm #532), with no user adjustments required to install, no natural light is required to clearly see your subject at night.

The Chrome-Dome Camera (#542) is design for flush mount within your office or home. Crystal clear color pictures with ordinary in-door lighting. Model #540 provides the flexibility to use a variety of CS mount lens to meet specific lighting and distance requirements, order the lens you need for your job. Just provide 12 Volt DC power and they are truly plug-and-play in operation. Professional Color NTSC video surveillance cameras— on a budget.
