

## **FreelineUSA's Survivable VoIP Internet Phone Systems Minimize International Costs for a Successful Multi-national NAFTA Business**

*FreelineUSA's survivable VoIP phone systems have been deployed by BCH Unique, Inc. for 24/7/365 Internet based voice communications between their Headquarters in Quebec, Canada and their new NAFTA manufacturing campus in Reynosa, Mexico... with no monthly VoIP charges.*

(PRWeb) December 20, 2006 -- FreelineUSA's survivable VoIP phone systems deployed by Canada's BCH Unique, Inc. for 24/7/365 Internet communications between their Headquarters in Quebec, Canada and their new manufacturing campus in Reynosa, Mexico, for no monthly cost Canada to Mexico international voice communications.

Highlighting another real-world application of its IP centric Internet video security and VoIP communications systems, FreelineUSA, Inc. is pleased to announce BCH Unique, Inc. at their Quebec, Canadian Headquarters and new Reynosa, Mexico manufacturing campus have selected FreelineUSA for their critical intra-company communications network.

BCH Unique is a privately-owned corporation, which specializes in processing cast polymers in order to produce custom accessories for OEMs as well as promotional products and recognition items for distributors. It operates out of Canada and the USA.

Since 1957, numerous businesses have counted on BCH Unique's experience and know-how to convey their image effectively in order to gain a solid edge on their competition. BCH Unique prioritizes first-rate customer satisfaction for every single client. BCH Unique is renowned throughout the world as a leader in its field, namely, the designing and manufacturing of identification and recognition products as well as other custom promotional items.

"Providing first class service while controlling internal costs ensures maximum value for BCH Unique clients. Providing low cost, real-time, voice communications between our facilities ensure our critical customer orders are delivered accurately and on time, at a less than expected cost," said Marco Gagne of BCH Unique. "Our loyal customers expect maximum value from BCH Unique and we continue to focus on this meeting this goal. When our customer's orders are involved, reliability of our voice communications systems is critical and resiliency is paramount"

"FreelineUSA, Inc. has worked closely with Mr. Gagne and Rafael Sevilla of AM-Mex Products to deploy the unique FL-USA 800 Survivable VoIP phone system for their new campus in Reynosa, Mexico via the Internet," said Robert Simkavitz, President and CEO of FreelineUSA. "We are pleased to count leading edge companies such as BCH Unique as a client and hope to meet their highest expectations."

Since their inception in 1990, AM-Mex Products has been well established in McAllen, Texas and Reynosa, Mexico and has provided leading manufacturing companies such as BCH Unique custom programs to design offshore NAFTA manufacturing entities to reduce both cost and risk, while maintaining control and maximum flexibility.
