

FL-USA 800 Survivable VoIP Series Description— product manual and brochure available on web at www.FreelineUSA.com

- The FL-USA 800™ Series** of VoIP technology provides the world's first fully distributed and resilient VoIP System for private corporate use. No centralized Gatekeeper or other common equipment is required. The FL-USA 800™ creates a fully interoperable VoIP communications network that works seamlessly with existing PBX/KEY Systems, at up to 200 locations world wide. Stackable to conserve IP addresses - with built in traffic shaping for QOS.

No additional equipment or software is required, order one pair or more of FL-USA 800. The FL-USA 800™ has integrated routing with the ability to provide DHCP addressing to LAN port attached PC's and Servers. The ability to easily traffic shape the out-bound data, originating from the attached sub-netted computers, permit first-class QOS prioritization for your VoIP Voice Services. Satellite IP compatible.
